Journal of Pipelines, 7 (1989) 329–330
Elsevier Science Publishers B.V., Amsterdam — Printed in The Netherlands

Contents Volume 7

Volume 7, No. 1

Analysis of pipe and compressor cost functions in natural gas transmission lines
F.O. Olorunniwo (Ibadan, Nigeria) 1
Pressure losses due to bends in pneumatic conveying
A. Westman, E.E. Michaelides (Newark, DE, U.S.A.) and F.M. Thomson (Wilmington, DE, U.S.A.) 15
Maintenance decisions for deteriorating water pipelines
S. Andreou and D. Marks (Cambridge, MA, U.S.A.) 21
Management systems for urban water distribution systems
N.S. Grigg, J. Gessler and J. Ruff (Fort Collins, CO, U.S.A.) 33
An improved model for start-up of pipelines containing gelled crude oil
M.G. Cawkwell and M.E. Charles (Toronto, Ontario, Canada) 41
Distributed parameter identification of a pipeline using a sensitivity model
C.-Z. Fang and L.-W. Tao (Beijing, China) 53
The phenomenon of rerounding
J.F. Bish (Delft, The Netherlands) 65
Modeling of pipe flow of a gas–solid suspension: electrostatic and gravity effects
S. Nieh, B.T. Chao and S.L. Soo (Urbana, IL, U.S.A.) 73

Volume 7, No. 2

Stability analysis of gas–solid transport with electrostatics
A. Zaltash, C. Myler and G.E. Klinzing (Pittsburgh, PA, U.S.A.) 85
A new approach for calculating concrete thickness of submarine pipelines
A. Dutta (New Delhi, India) 101
Analysis of particle size distribution effects on the pipeline transportation of coal slurry fuels
T. Dabak and O. Yucel (Annapolis, MD, U.S.A.) 109
Ultrasonic flowmeter tests with slurries
J.M. Colwell, C.A. Shook, R.G. Gillies and M. Small (Saskatoon, Sask., Canada) 127
Modified elastic model for soil–pipe interaction
N. Galili and I. Shmulevich (Haifa, Israel) 141
Non-isothermal flow of viscous liquids: Engineering correlations for scale-up guidelines
A.K. Dey (Pune, India) 153
A method for the rheological characterisation of tube viscometer data
J.H. Lazarus (Rondebosch, South Africa) and P.T. Slatter (Cape Town, South Africa) 165
An instrument to measure chord-averaged concentration profiles in two-phase pipeline flows
N.P. Brown (Sunbury, Great Britain) 177

Volume 7, No. 3

Pulsating flows of solid/liquid suspensions. III. Sand/water suspensions in compliant hoses
G.F. Round, A.H. Hessari (Hamilton, Ont., Canada) and R.F. Bauer (Mississauga, Ont., Canada) 191
Analysis of data from an operating compressor station
W.J. Turner and M.J. Simonson (Sutherland, N.S.W., Australia) 205
Seismic behaviour of buried pipelines – A state-of-the-art review
E.A. Mashaly (Alexandria, Egypt) and T.K. Datta (New Delhi, India) 215

Optimum energy cost design of oil and gas pipelines
G.A. Okpobiri and J.A. Ajienka (Port Harcourt, Nigeria) 235
Use of an elbow flowmeter with slurries
J.M. Colwell and C.A. Shook (Saskatoon, Sask., Canada) 243
Characterization of Canadian Arctic thixotropic gelled crude oils utilizing an eight-parameter model
M.G. Cawkwell and M.E. Charles (Toronto, Ont., Canada) 251
Start-up of pipelines containing gelled crude oils: Comparison of improved model and pilot pipeline data
M.G. Cawkwell and M.E. Charles (Toronto, Ont., Canada) 265
Seismic stresses at the intersections of buried pipelines
E.A. Mashaly (Alexandria, Egypt) and T.K. Datta (New Delhi, India) 281
A method to minimize costs or maximize flow rate of pumping crude oil inside pipelines using a new drag reducing additive
A.R. Mansour (Irbid, Jordan) and Z.A.R. Aswad (Baghdad, Iraq) 301
Pressure losses in two-phase gas–non-Newtonian liquid flow in a horizontal tube
S.K. Das, M.N. Biswas and A.K. Mitra (Kharagpur, India) 307
